TEACHERS' CONVENTION BEST HELD IN WETASKIWIN

Inspectors Fife and Fuller in Attendance. Dean Kerr, of University Gives Address at Banquet. Addresses on Work of A.T.A. Report of Nominating and Resolutions Committee.

The annual convention of the teachers of the Wetaskiwin inspectors was held in the Alexandra school, Wetaskiwin, on Thursday and Friday of last week. The convention was one of the best ever held in this inspectorate, as the attendance almost reached the hundred mark, and the keenest interest was taken in the proceedings throughout.

The first session opened Thursday morning with the singing of "O Canada," which was followed by a few words of welcome to the visitors by the president, Mr. Munn. Addresses of welcome were also given by Mayor Montgomery, Mr. G. C. Macdonald, chairman of the public school board, and Mr. J. J. Christopher, chairman of the separate school board. Mr. Maguire, of Ponoka, replied very fittingly on behalf of the teachers.

The first business of the convention was the selection of committees, which resulted as follows:

Nomination—Miss Wilkins, convener; Miss Maybey, Mr. Poops, B.A., Miss McCready, and Miss Koenig.

Resolution—Mr. Dancy, convener; Miss Peterson, Mr. Patrick, Miss Bawden and Miss D. Walker.

Question—Mr. Fuller, B.A., convener; Mr. Macdonald, Miss Kallio, Mr. McGregor and Miss James, B.A.

An interesting address on the work of the Alberta Teachers' Alliance was then given by Mr. Dwyer, of Edmonton, who gave an explanation of the A.T.A. platform, and agreements between school boards and teachers. He urged that teachers should not reply to advertisements for positions where the salary was not stated. The speaker stated that there was a shortage of teachers in the province at the present time.

The first business at the Thursday afternoon session was an address on "Nature Study" by Mr. Fife, inspector of schools, Edmonton. This was a most interesting and educational address which was full of good information for his hearers. He pointed out that this study gives children some idea of the great world of nature in which they live; and it teaches children to observe accurately. Mr. Fife suggested different methods of teaching the subject.

The convention then divided into sections, which remained in session for the remainder of the afternoon:

Junior

"Holding Interest in Primary Arithmetic," by Miss Foller.

"Composition Lesson with the Aid of a Picture," by Miss Ward.

Senior

A lesson in Grade VI History, subject "Charlemagne" by Mrs. Crichton; Grade V Geography, "Railroad and Automobile Trip," by Miss Lettine.

High School

"The New Grade IX Course," by Mr. Wells.

"Unit System in Promoting," Mr. Dancy.

"How to Secure Results in High School Composition," by Miss James, B.A.

Banquet on Evening

On Thursday evening a banquet was held in the Criterion hotel, which all the delegates and a few outsiders attended. An excellent menu was provided by Miss Hall Smith and the meal was quickly and well served. The principal speaker for the occasion was Dean Kerr of the University of Alberta, and he chose as his subject "French Canada."

The address was very interesting and instructive and he kept the entire gathering in the best of humor as he related some of the characteristics of the people of the province of Quebec, and at the same time referred to the prominent places they take in the Dominion. The musical part of the program consisted of a vocal solo by Mrs. A. Johnson and a piano duet by Misses Robinson and Inglis.

Friday

On Friday morning, Mr. E. L. Fuller, B.A., inspector for the Wetaskiwin inspectors, gave an address on the "Psychological Aspects of Dieting." He dealt with the different stages through which a child passes, and explained how one might manage children during these different periods. The address was highly instructive and greatly enjoyed.

The questioner was then opened, and the questions answered by the different members of the committee.

The convention again divided into sections when the following subjects were discussed:

Rural

"Rural Time Tables" by Miss Henderson.

"Duty Work in Primary Grades," by Miss Novotny.

Urban

"Arousing Interest in Literature," by Mr. Hollingshead.

"Rapid Calculation" by Mr. Earl Garlough.

High School

"New Grade X Course," by Mr. Poops, B.A.

"The Place of Outside Activities in the High School," by Miss Bawden, B.A.

CORRESPONDENCE COURSE GIVEN BY THE UNIVERSITY

In view of the widespread interest and active participation in the correspondence courses in Economics, conducted by the Department of Extension of the University of Alberta during the past two years, and in response to requests from correspondents for more advanced work, it has been decided to offer this season a third course in "Money and Banking," in addition to those previously conducted in "Principles of Political Economy" and "Economics of Agriculture."

The aim of these extension courses is to make available to individuals or groups within the province, who are desirous of pursuing systematic studies in economic and sociological subjects, but who are unable on account of age, distance, or occupational responsibilities to attend the University, the opportunity of carrying on such work at home, under the direction of a University instructor.

TWO WEEKS TO SEE THRESHING ENDED

Winnipeg, Oct. 21.—According to the weekly crop report of the Canadian Pacific Railway, threshing was resumed toward the end of the week and good progress is generally reported. On account of the prolonged wet period lately experienced, many of the eastern harvesters returned home and a shortage of help is anticipated in many districts. The situation, however, will to some extent, adjust itself as outside help has been called in. The harvesters have been released for work in other localities. Full time seedling is in progress where the threshing has been completed and some plowing is being done. It is not expected that the latter operation will be extensive this year, owing to the delay in commencement, unless the next three or four weeks favor the farmers with good open weather and no severe frosts.

Manitoba—Good dry weather. Grain in stock is rapidly becoming fit for threshing which was resumed generally on Thursday last. According to reports the grain has not been damaged very materially by recent wet weather, though, of course, there is considerable toughening with a reduction in the grade.

Friday—One per cent of the threshing is completed.

Saskatchewan—Threshing is again in full swing under the most ideal conditions, most machines recommended on the nineteenth. Approximately 75 to 75 per cent of the threshing is done to date, and as the grain is in good condition it is expected progress will be rapid from now on. Considering the drenching the stocks received there is surprisingly little damage done to the grain, and this probably is due to toughening, though one or two reports of sprouting in the stocks have been received.

Alberta—Weather conditions are now entirely favorable and threshing is being carried on vigorously. Ten days or two weeks' good weather should suffice to get the grain through the machine. To date 80 per cent of the crop in the south has been threshed and 50 per cent in the most northerly sections of the province.

The corn crop, owing to the very wet, cool season, is much below average, and taking the province over it is only 75 per cent of last year and not of the best quality.

Edmonton, Danvegan and British Columbia railway—The weather improved during the week and threshing has been resumed. It is expected in ten days should see the grain threshed. Wheat continues to come into the elevators in considerable volume, a large percentage of it, however, grading tough.

**TERRIFIC GAS PRESSURE
LIFTS CASING OUT OF
ROYALTY GAS WELL**

After being capped with a 2,000 valve on Saturday afternoon and repairs, the highest ever recorded in gisting a rock pressure of 1,200 Alberta, the Number 4 well gas well of the Royalty company at Black Diamond, broke from control and shot valve and casing nearly to the top of the derrick.

After the first big blast of gas, which tore away bricks near the top of the derrick, the casing was practically blocked the flow.

COUNCIL PASSES TWO BYLAWS

The regular meeting of the city council was held on Tuesday evening last with all the members in attendance except Ald. Chamber.

After the minutes of the last regular meeting had been read and adopted, Dr. Gunderson addressed council respecting one of his patients, asking council's assistance in securing suitable attendance for his case. It was decided to leave the matter to H. M. Angus, J.P.

Dr. A. S. McColligan, medical health officer, reported only one case of quarantine—a case of scarlet fever.

J. Johnson said interviewed council regarding his business tax, and owing to the special circumstances of the case, it was decided that the taxes and balance of 1924 business taxes amounting to \$35.35 be written off and the sum of \$5.00 be accepted as payment in full.

The offer of E. H. L. Thomas to rent city property on west Railway Street was left to the public property committee and the city solicitor.

The taxes on the property of Mr. Richardson, of Chicago, was made the same as last year, providing his accepted the lots given in exchange for the city for his former lots in the cancelled subdivision.

It was moved that the annual fee of \$15.00 be paid to the Union of Alberta Municipalities.

The mayor and secretary were appointed delegates to represent the council at the convention of the Union of Alberta Municipalities, and they outlined any resolutions that may be found necessary to place before the convention.

It was moved that the transfers for lots given by the city to Julius Schroeder and now returned to the city, be cancelled.

The tender for the season's coal received from the Dinan Coal Co., quoting egg coal over 2 inches, at \$4.21, and nut over three-quarter inch, at \$3.56, l.o.b. Wetaskiwin, was accepted.

It was moved that the action of the finance committee in dealing with the business tax of Alex. Knox be ratified.

The matter of the claim of J. K. Schrefels submitted by Mr. Knox was referred to the finance committee and the city solicitor, for inspection, and report to council.

The report of the police committee recommending that the salary of the chief constable be increased to \$125 per month, commencing Nov. 1st, was adopted.

The following accounts were passed for payment: General \$170.95; Electric light \$567.32; Waterworks, \$3.50; Supplementary \$331.02.

An account of Ed. Reynolds of \$20 for service in connection with gas wells was referred to the gas well committee.

An account of Chas. Kohl of \$12 for painting signs for auto camp was passed.

The chairman of the light and water committee was asked to see that an outside water connection be discontinued.

Arrangements of light and water of parties who have left the city were recommended to be written off by the light and water committee, and balance of arrears be referred to city solicitor for collection.

The finance committee recommended that a list of old tax arrears be written off.

It was moved that the city exchange one lot next to John Asp's residence for two lots offered by him.

The public works committee reported that part of Dickson Avenue had been raised and the sewer properly covered to prevent danger from frost, and that east Railway street was now being graded.

A resident who wished his auto tax reduced was informed that the council cannot make any reduction.

Bylaw No. 492, authorizing sale of lots to Mrs. Ben Fortias was read three times and finally passed.

Bylaw No. 493 authorizing payment of the annual indemnity to the mayor and aldermen was read three times and finally passed.

The Wetaskiwin Tennis Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

The Wetaskiwin Recreation Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

The Wetaskiwin Recreation Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

The Wetaskiwin Recreation Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

The Wetaskiwin Recreation Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

The Wetaskiwin Recreation Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

The Wetaskiwin Recreation Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

The Wetaskiwin Recreation Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

The Wetaskiwin Recreation Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

The Wetaskiwin Recreation Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

The Wetaskiwin Recreation Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

The Wetaskiwin Recreation Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

The Wetaskiwin Recreation Club will be allowed the use of the city lots in block 52 on condition that the club would pay the city taxes each year on the lots used.

HOCKEY CLUB IS RE-ORGANIZED FOR THE SEASON

The annual meeting of the Wetaskiwin Hockey Club was held at the Driard hotel on Monday evening, with a rather poor attendance. The minutes of the last meeting were read and adopted, and the financial statement of the club showed all accounts paid, but a very small balance to begin the coming season.

Officers for the year were elected as follows:

Hon. Pres.—Curt Smith.
Pres.—L. H. Newville.
Vice Pres.—J. F. Richards.
Sec.—Treas.—Earl Garlough.

Executive—L. H. Newville, J. F. Richards, E. Garlough, J. S. Orr and H. J. Stevens.

C. B. McMurdoo and A. E. Maggs were appointed delegates to the annual league meeting to be held at Ponoka on Friday afternoon of this week.

B. French and C. B. McMurdoo were appointed a committee to meet the rink company and make arrangements for use of the rink for the season.

From present indications Wetaskiwin will have equally as good if not a better hockey team than last year, and with good support on the part of the citizens, should again be successful in winning the coveted Driard Shield, which they now hold as champions of the Big Five League.

OWNER IDENTIFIES STOLEN JEWELRY

Two men, who were arrested at Wainwright, a short time ago and sentenced to Port Saskatchewan on a charge of carrying concealed weapons, were brought to Wetaskiwin on Saturday last and appeared before E. E. Chandler on the charge of breaking into and stealing jewelry from the store of H. R. French in July last. They gave their names as Jack Norris and Jack Monohoff. Mr. French positively identified a watch which was found in their possession when arrested, as well as some other articles. They were sent on to the Port on Saturday afternoon's train. It is reported that they had about \$800.00 worth of jewelry in their possession when arrested.

Strathcona Man Was Accidentally Killed

Without having recovered consciousness following injuries received at the Granite Curling rink Saturday morning, Norman Cuthbertson, well known south side contractor, passed away at the University hospital shortly after twelve o'clock Saturday night. The accident took place at one o'clock while the roof of the eastern end of the rink was being raised preparatory to erecting a second story waiting room. Mr. Cuthbertson, who was one of the most enthusiastic members of the club, had undertaken the work at a low tender and was supervising the building himself. He was standing on the scaffolding while the portion of the roof was being hoisted with a block and tackle. Suddenly a stay broke and the heavy timber crashed in the ground, catching him underneath and carrying him to the wooden sidewalk which was broken by the force of the fall. When he was removed from under the debris it was seen that he had been seriously hurt and he was hurried to the hospital where a consultation of physicians was at once held. During the afternoon an operation was performed in an attempt to save his life but the skull had been fractured and he had also received internal injuries. Death came shortly after midnight.—Journal.

The late Mr. Cuthbertson was a nephew of Mrs. R. M. Angus, of Wetaskiwin, and is known here as he had attended several Wetaskiwin bonspiels.

IMMIGRANTS BROUGHT IN WITHOUT PROPER MEANS OF SUPPORT

Red Deer, Oct. 19.—At a recent meeting of the council of the Municipal District of Wetaskiwin, the following resolution was passed: "That the secretary treasurer be instructed to point out to Mr. Speakman M.P., and the department of immigration and colonization the need for action in regard to the bringing in of immigrants when they have no visible means of support, more especially as it affects this municipality."

KIWANIANS ADDRESSED ON "INTELLIGENCE TESTS"

Professor Laycock, Ph.D., of the University of Alberta, was the Principal Speaker at Regular Meeting on Tuesday Evening. One New Member was Introduced.

At the regular weekly meeting of the Kiwanis club on Tuesday evening the speaker was Professor Samuel Laycock, Ph.D., of the University of Alberta, who brought before the club the new and interesting subject of Intelligence Tests.

He spoke of the three stages of education through which the world has passed. The first centering around the 5th century, B.C.—the age of Plato, Aristotle, and the great Greek minds of that time. The second, the period of the Renaissance, and the third the present, when education enters a purely scientific stage.

It is only during the last ten years that the system of measuring intelligence has been invented and carried to its present degree of perfection. The idea of discovering the mental age apart from the chronological age is quite new. We are now working under a new type of examination and a new scale in education.

By the examination of many thousands of children in the United States by exactly the same sets of questions it has become possible to standardize the intelligence age levels and children can now be graded according to this definite classification, as idiots, imbeciles, normals, dull normal, normal superior intelligence, genius.

The speaker gave a brief outline of the questions asked under the various tests and referred to the use made of this method in grading millions of men in the American army during the great war. Also the use being made of it in the schools of our own country.

Prof. Laycock is rapidly becoming recognized as one of the outstanding Canadian authorities on modern education methods, and is the compiler of the Laycock System of Intelligence Grading. The local Kiwanians were much favored in having him as their guest.

During the evening several visitors were introduced to the club, and Rev. Father Walravens was constituted a member of the club. Kiwanian W. H. Odell presided.

1,420 Candidates Nominated to Run For British House

London, Oct. 19.—The 1,420 candidates nominated for parliament yesterday comprise the following party classification: Conservatives, 532; Constitutionalists, 7; Liberals, 341; Laborites, 501; Cooperatives, 9; Communists, 5; Independents, 12; Republicans, 7; Sinn Fein, Nationalists and Prohibitionists, one each.

Because of the large number of the Liberal withdrawals, there will be straight fights between Conservatives and Laborites in no less than 247 contests. Moreover, owing to last year's party activity in nominating extra candidates, chiefly by the Labor party, there will be more triangular fights than was expected—227, distributed as follows: London, 33; English boroughs, 71; English counties, 104; with the remainder in Wales, Scotland and Ireland.

Thus, three cornered fights are distributed over the whole kingdom and make the outcome of the election very difficult to predict.

There are 41 women candidates. Labor supplying a majority of them, 22, to be exact, while the Conservatives have nominated 12, the Liberals 6 and the Independents one. Lady Astor, the Duchess of Athol, Lady Terrington and all the women members of the last parliament are seeking reelection. The other women candidates include many well known in the women's movement.

24,466 CANADIANS CAME BACK TO DOMINION FROM STATES IN SIX MONTHS

Ottawa, Oct. 21.—Canadians to the number of 24,466 returned to Canada from the United States during the first half of the present fiscal year, according to immigration department figures. Of this number, 23,414 were Canadian born citizens, 2,632 were British subjects who had acquired domicile in Canada and later returned to the United States, and 1,719 naturalized Canadian citizens.

The statement of the department shows a falling off of ten per cent in immigration from all countries to Canada during the first half of the present fiscal year as compared with the same period a year ago. Total immigration up to September 30 of the present year was 52,212 persons from all countries. Immigrants came from Great Britain to the number of 42,758, from the United States 10,155, and from other countries 32,599. During the first half of the fiscal year, 23,414 total immigration was 94,333, divided as follows: British, 51,919; United States, 12,055; other countries, 23,317.

WESTERN PROVINCES WILL UNITE ON RATES

Joint action will be taken by Alberta, Manitoba and Saskatchewan to endeavor to upset the recent ruling of the Board of Railway Commissioners, and an appeal has been made to the Governor General in Council to stay in the execution of the decision of the board. H. J. Synglinton, K.C., has been instructed by the western provincial governments to make application to the Supreme court to have to appeal, the grounds for the appeal being the jurisdiction of the board to pass an order which goes contrary to an act of the parliament of Canada.

DRUMHELLER MINES ARE OPEN FOR WORK

Drumheller, Oct. 19.—At a special meeting of the members of the Atlas and Midlandville locals of the United Mine Workers of America, held in the Miners' Hall, Drumheller, Sunday afternoon, a full discussion of the recent strike settlement vote was held and the men unanimously decided to go back to work Monday morning.

Wayne mines were all working full blast Saturday, while the Big Rose Deed mine at Rosedale got under way Saturday, so now as the whistles blow Monday morning for work throughout the Red Deer valley coal field, the boys will all take up their tools and soon this domestic coal field will be back to normal after nearly six months of idleness.

BAD GUN MISHAP AT SYLVAN LAKE

Red Deer, Oct. 20.—Joseph Cochet, living at Sylvan Lake, was the victim of a serious accident on Thursday afternoon, which may cost him his right leg. He was plowing, and had a shot gun on the plow on the chance of getting some chickens. Somehow the gun was discharged, the shot passing through his right leg below the knee, carrying away the smaller bone and a great part of the muscle. He is now in the Red Deer hospital.

GOLDEN EAGLE SHOT AT VIKING

Local nimrods at this time of year are returning with all sorts of trophies of the chase. The latest of these is a monster golden eagle, which was shot by one of our nimrods on Thursday week by W. H. Calder of Edmonton. The big bird measures 7 feet 2 inches from tip to tip and is equipped with a remarkable set of talons and beak. He was laid low with Mr. Calder's trusty shotgun, but succeeded in putting up a desperate fight before being finally dispatched.

WETASKIWIN MAN IN AUTO ACCIDENT

As George L. Owen and a couple of companions were returning from Edmonton Saturday evening, an accident took place about six miles north of Leduc. The spindle arm of the car he was driving was not working correctly, and he collided with another car, the result that both autos were slightly damaged. Nobody was seriously hurt, but a lady in the car hit by Mr. Owen received slight injuries to the face.

PROFESSIONAL

MEDICAL

C. N. GUNDESEN, M.D., M.C., L.M.C.C.

OUR TRIP TO EUROPE

(Continued from last week)

On Saturday morning, July 25th, when we awoke, we found that our boat, the Montclair, had anchored off the coast of Ireland, and we were about thirteen miles from the city of Belfast. No privilege accorded the party of Canadian editors during the entire trip was more appreciated than when the Canadian Pacific Railway Steamship authorities made arrangements to hold our steamer at Belfast for one day to enable us to visit that city. We felt very sorry for the rest of the passengers because private parties were used for our party only and they were obliged to remain on board and were quite incensed at the delay. Not in the end they had no complaint, but the delay was a great inconvenience. The ship was at the wharf at the request of the Belfast newspapers and authorities, who were determined that we should visit their city.

But just imagine trying to see Ireland, "the emerald gem set in a silver sea," in a few hours. As we went off the wharf, we passed vast ship-building yards, where some of the largest ocean going vessels have been built. The Titanic and the Lusitania, both ill-fated boats, were built here. Nowhere was our welcome more cordial than in Belfast. From the time we landed at the Donegal Quay, until the Lord Mayor in person said goodbye to us at the same place, we were treated with the utmost kindness. We were given a delightful drive around the city, when we saw the York St. Hotel, the most magnificent of its kind in the world; the churches, parks, university buildings, in fact, everything which goes to make up an enterprising and progressive city. We got a glimpse of the renowned jugging car, too.

At the Y.M.C.A. we were the guests at luncheon of the Ulster district of the Institute of Journalists, which was presided over by Mr. Thos. Boyd, of the Ballymena Weekly Telegraph. We were glad to know that Ulster is such a loyal state. The south coast of the island is a very attractive and never seem to get anywhere with it all, or really know what they want. One of our hosts said: "All they seem to want is to be left alone in peace to fight it out." The north has remained loyal to the British crown, and spends its time enlarging its enterprises and building up a stronger country.

After luncheon, some of the party went to the Seamen's church, where we found a good spot to witness the royal procession when the Duke of Connaught and his family were on their way to the harbor. The city was gay with flags and bunting in honor of the royal guests, who had been on a visit to Belfast during the week, when they unveiled the new university war memorial and laid the corner stone of the new city art gallery and museum.

The Belfast city hall, where a reception was held during the afternoon, was one of the finest structures we saw on the entire trip. It is practically all built of marble, the most of it being in Italian, and the pillars, Grecian marble, which is greenish grey, with white columns. It is the most beautiful marble we ever saw, and all the more so because it is impossible to procure it now.

Belfast is quite a modern city, and has none of the earmarks of antiquity. A century ago it had a population of about 30,000; today it has nearly 600,000. With few natural advantages it owes its growth and prominence to energy and enterprise of its citizens. It is the great centre of the linen trade and has the largest linen factory in the world. In all, there are in the Belfast district about fifty spinning mills with over a million spindles, and more than one hundred weaving factories with nearly 40,000 looms, giving employment to over 60,000 hands. During the war, all the linen for the British army was manufactured there. Belfast also has the largest tobacco factory in the world, that of Messrs. Gallaher.

Some of the members of the party went to the office of the Belfast Telegraph, which was inspected with much interest. One of the interesting devices was a machine for automatically writing out from the typewriter, dispatches received over the telegraph wires. The dispatches are punched out on tape, which is then fed into a special typewriter, which spells out the words without human intervention. In London, some of our party had been shown a machine for writing direct off the wire. The next thing will be to operate the linotype by electricity, and simultaneously the power altogether. The Telegraph is credited with the largest circulation of any paper in Ireland and was the first halfpenny paper in the country. It now sells for three-halfpence. The

proprietor is Sir Robert Laird, who was one of those most anxious that we should visit Belfast, and who devoted himself assiduously to our entertainment, coming out to meet us on the tender which conveyed us from the big boat, and remained with us practically all day, notwithstanding the demands made upon him on account of the royal visit.

But evening came all too soon and we were obliged to leave for the boat and proceed on our voyage homeward. We were very loathe to leave Ireland because we felt that we had only a fleeting glimpse of it and that the people whom we met were so kind we should like to have known them better. The final mark of distinction conferred upon us was when Sir William Turner, the Lord Mayor, and Lady Turner, with several members of their household, came down to the quay and shook hands with every member of the party as they got on the tender and bid them goodbye and God speed.

As the shore receded from our view we waved a last goodbye to the dear old Motherland, with a sigh of regret that our wonderful visit was at an end, but with a sigh of satisfaction, too, in view of the fact that it could not have been pleasant. We soon boarded the great ship Montclair, which raised her anchor and turned her prow westward towards Canada—and we were homeward bound.

We were favored with fair weather and the ship made a quick passage, but nevertheless, the time flew so slowly. This may be accounted for partly owing to the fact that our days were twenty-five hours long, whereas going over they were only twenty-three hours and twenty minutes. Very few of our party were sick, but all suffered more or less from the cold, as we took the northern passage, and entered the Straits of Belle Isle. One of the party said that the next time she went across she would ask the captain not to go quite so close to the north pole. We had a very jolly time on our return, the postmen being dancing on the deck, playing bridge, and singing the old melodious songs, and some new ones. We learned this new one from an Irishman who escorted us on the tender, and it became very popular: "Donagh-dee is my home; Take me back to Donagh-dee; Donagh-dee is my home; Take me back to Donagh-dee. Far over the foam I'd rather sit by my own peat fire Than live in your smoky town; So take me back to Donagh-dee. Tra-la-lal! Tra-la-lal! In dear old county Down. For it's five miles from Bangor to Donagh-dee."

We encountered very little fog and no icebergs. We were informed there were two icebergs on our course, but we did not see them. We did run quite close to a school of porpoises, and coming up the St. Lawrence we saw a number of seals, which were quite close to the vessel. As we finally sailed up the St. Lawrence and sighted once more the old familiar Laurentian Hills and the dear old shores of the homeland, and watched the glorious sunset, we felt that after all Canada was a fair and beautiful land, and one of which we might be justly proud. We were reminded of the lines of the poet: "Breathes there the man with soul so dead, Who never to himself hath said: 'This is my own, my native land? Whose heart hath he never within him burned, As home his footsteps he hath turned From wandering on a foreign strand? If there be such—go mark him well For him no minstrel raptures swell. Houndless his wealth as wish can claim. Despite those titles, power and pelf. The wretch concentred all in self, Living shall forfeit fair renown, And doubly dying, shall go down To the vile dust from whence he sprung Unwept, unhonored and unsung! (To be continued)

INJURED MAN ASKS FOR 72 GLASS EYES AND OTHER DAMAGES
Saskatoon, Oct. 19.—Suing for damages from the Canadian Pacific railway for the loss of an eye, which occurred while in its service, counsel for Harry Sytnyk of Saskatoon, asked the judge to allow heavier damages than the \$1,000 already paid into court by the railway, because his client, during his estimated span of life, 36 years, would require 72 glass eyes, at \$10 each. Evidence of three physicians, one of them an eye specialist, was given that the average glass eye wore out in six months, becoming rough and uncomfortable to the wearer from the abrasion of grit between it and the eyelid. Judgment was reserved.

Head and Chest Colds Relieved in a New Way

A Salvo which Releases Medicated Vapors when Applied Over Throat and Chest.

Inhaled as a vapor and, at the same time absorbed through the skin like a liniment, Vicks VapoRub reaches immediately inflamed, congested air passages. This is the modern direct treatment for all cold troubles that is proving so popular in Canada and the States where over 17 million jars are now used yearly. Splendid for croup, bronchitis, bronchitis, croup, head and chest colds, catarrh, asthma or hay fever. Just rub Vicks over throat and chest and inhale the medicated vapors. It quickly loosens up a cold.

THIRTEENTH CROP REPORT

Under ideal weather conditions, threshing operations are drawing to a completion in Southern Alberta, and are well under way in Central and Northern Alberta with the prospect that the end of the present month will see most of the fields cleaned up.

Since last report, cold, wet weather interfered rather seriously with the threshing of the grain for nearly a week, but the sun (which has been ideal for threshing operations. Frost, backward weather and the second growth of grain consequent upon late rains, have resulted in considerable loss of grain coming to market, and a general lowering of the grades of all grains throughout the province, chiefly in central and northern districts.

Though a large area in the province is producing light yields this season, due to lack of sufficient moisture in the early part of the growing season, some districts are recording very satisfactory yields. In Central and Northern Alberta, high average yields are being obtained, and the same applies to the more favored districts of central Alberta and the northern district of Peace River.

In the irrigated districts, fall irrigating is being done on a large scale, and a considerable area is being prepared for sugar beets for next season.

Feed is fairly plentiful throughout the province, and will not present any serious problem during the coming winter. A large amount of greenfeed is being harvested, although the hay crop has been light. The alfalfa crops in the south have been good and of excellent quality.

ALBERTA COAL STRIKE ENDED; VOTE IS CLOSE

Calgary, Oct. 18.—Alberta union miners have ratified the new working agreement, according to an announcement made today by Wm. Sherman, president of District 18, U.M. W.A.

The return from fourteen of the principal mining camps, as compiled at the offices of the United Mine Workers of America here on Friday morning, gave a total of 2,335 for the agreement, compared with 1,981 men against, a majority of 454, as follows:

The agreement was voted by Fernie and the Crowfoot Pass district, where financial stringency has been greater than in other sections, especially in Fernie, where many of the miners suffered losses when the Home Bank of Canada closed its doors. Taking the vote on a whole, however, it was extremely close.

Boils and Pimples ARE CAUSED BY Bad Blood

When the blood gets out of order it is only natural that boils, pimples, or some other indication of bad blood should break out of the system.

What you need, when this occurs, is a good blood purifier, to cleanse and put the blood into proper shape.

For this purpose there is nothing on the market to-day so equal

Mr. L. A. Delbert, Allan, Sask., writes:—"For several years I was troubled with boils and pimples. I tried many treatments, but could get no results. I then took Dr. B.B. Blood Purifier and became free of my trouble. It is the only medicine I took that did me any good."

B. B. B. is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

PROBABLY KEEP WEMBLEY GOING

Ottawa, Oct. 18.—There is a possibility that the Dominion government may consent on its part to the extension to next year of the British Empire Exhibition. When the matter was up recently the disposition was against continuance although officially it was not decided. Meanwhile strong representations have been received not only from the British government but from many Canadian bodies emphasizing the advertising value to Canada of the exhibition, and consideration of the whole matter has been reopened.

It is thought probable that the exhibition will be revived next year.

Why We Catch Cold

A cold is a serious thing; it is not due to exposure; we rarely get colds by wetting of it, and we do not "catch" it, says Dr. Julian Clarke in Farm and Home. Colds are now known to be due to a germ. When we get a cold it means that the cold microbes have gotten into our nose and throat and have found a suitable place in which to grow and multiply in the mucus which is given off by these tissues. When our body is in prime physical condition, the mucus covering of the nasal membranes does not afford the germs a suitable food and harbor for development. In other words, the normally resistant membranes of the nose and throat have the power to destroy these, and other germs, before they acquire a foothold within the deeper tissues.

Exposure is not the cause of catching cold. Many people get colds while indoors, attending public meetings, and in overheated houses while multitudes, often very poorly clad, are out in all sorts of weather with impunity, and yet do not take cold.

A stuffed up, weeping nose has heretofore been a joke, rather than a cause for alarm. In the long ago a treatment for colds in the head was to hang one's hat on the bed post and to drink whiskey and water until you saw two hats. In more recent times it was quinine and nauseous tea, with close confinement in an overheated living room, where the whole family was obliged to suffer during the evenings. An open window, or the least bit of fresh air, was thought to be sure to drive the trouble down into the lungs, with the danger of pneumonia and consumption.

We are learning that the best treatment for the ordinary cold of the head is to supply the system with a nourishing food, easily digested, and an abundance of fresh air, until you saw two hats. In more recent times it was quinine and nauseous tea, with close confinement in an overheated living room, where the whole family was obliged to suffer during the evenings. An open window, or the least bit of fresh air, was thought to be sure to drive the trouble down into the lungs, with the danger of pneumonia and consumption.

An open window, or the least bit of fresh air, was thought to be sure to drive the trouble down into the lungs, with the danger of pneumonia and consumption.

Caught Disease On the HANDS!

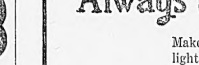

Skin disease threatens us every day. Inevitable germs of blood-poison, eczema, etc., are waiting to infect the least cut or sore place. The money you use carries germs—get them on the handles, rails and straps of the trains and street cars, and in a score of other places.

Safely through Zam-luk, Mr. Henry C. Davis, of South 37th Street, Kansas City, U.S.A., has just escaped a violent type of eczema, contracted, he says, through use of public towels.

"I had medical advice," he says, "tried in addition all sorts of so-called eczema remedies, without finding the hoped-for relief. Zam-luk treatment soon gave positive results. It took away the painful irritation and quickly purified and healed the deep troublesome sores."

A wonderful all-purpose flour

So say thousands of housewives who use Quaker Flour for all their baking. Its even texture and never-varying baking qualities make it the delight of all who use it.

Makes larger, whiter loaves; better pastry; lighter cakes.

National Poppy Day Campaign

As each successive anniversary of Armistice Day has passed, the sentiment has become among the peoples of the allied nations, more evident showing the reverence in the hearts of the people for the heroic dead who made peace possible.

The children of the devastated area of France gave the nucleus of this idea which has rapidly gained recognition until not only Canada but in Britain, France, Italy, and the United States the poppy is worn in memory of "In Flanders Fields the Poppies Grow", when they gathered the little red poppies and decorated the graves of the fallen heroes near their homes.

Each year on November 11, the proposal has advanced, and the wearing of the poppy as an expression of deep reverence for the memory of the dead meets with more sympathetic approval throughout the country. Last year there were very few citizens in Canada who did not pay their tribute to the dead in this way.

Initiative

The world bestows its big prizes, both in money and honors, for but one thing. And that is Initiative. What is Initiative? I'll tell you. It is doing the right thing without being told. But next to doing the right thing without being told is to do it when you are told once. That is to say, carry the message to others; those who can carry a message get high honors, but their pay is not always in proportion. Next, there are those who never do a thing until they are told twice; such get no honors and small pay. Next, there are those who do the right thing only when necessity kicks them from behind, and these get indifference instead of honors, and a pittance for pay. This kind spends most of its time polishing a bench with a hard-luck story. Then, still lower down in the scale, there is this, we have the fellow who will not do the right thing even when some one goes along to show him how and ways to see that he does it; he is always out of a job, and receives the contempt he deserves, unless he happens to have a rich uncle in which case Destiny patiently awaits around the corner with a stuffed club. To which class do you belong?—Elbert Hubbard.

Hallowe'en Coming

In a week or so Hallowe'en will be here, and already plans are being made for entertainments that night, the last of the month. It gets its name from the fact that it is the night, or evening before All Hallowmas, or All Saints' Day. For some hundreds of years, strange costumes, practices and charms have been practiced on this night and though superstition is not so common as it used to be, still we may find those who honestly believe that a girl who will take a candle at exactly midnight and go into a dark room and look into a mirror, will see peering over her shoulder the face of her future husband!

It is impossible to trace the origin of many of these superstitions, and none of them seems to have any connection with All Saints' Day. But they gave unlimited opportunity for fun at a party, and provide the hostess with a wide choice in decorations and program. Black and orange are usually the colors chosen—probably on account of the orange of the pumpkins of which the golden hue is so often made, by scooping them out and cutting faces and inserting a lighted candle so the boy may carry it out, to look through neighbors' windows and scare the little folks inside! These pumpkins, and witches and black cats cut from black paper or cloth, the witches' kettle and broom, black bats, witches' hats with pointed crowns, the wide old owl who isn't afraid of the witch or her cat, are the chief figures used at this season. Ghosts are also popular, because of the "scary" element.

Calgary, Oct. 19.—Chester M. Elliott, aged 34 years, of Calgary, manager of the Alberta Wheat Pool, died suddenly in a Vancouver hospital at 6 o'clock Sunday afternoon from heart failure, according to a telegram reaching this city tonight.

CENTRAL CANADA'S BIG FUEL PROBLEM

In a recent issue the part played by Welsh and Scottish anthracite in helping to make Central Canada independent of foreign fuels was described. There remains to be dealt with the assistance that our own coal fields can provide in solving the problem presented by the "acute fuel area." One of the possible sources of a Canadian coal supply for Ontario and Quebec is the province of Alberta and it is with the possibilities and problems of this source that the present article deals.

Alberta has immense resources of coal. The problem is how to get it to far away Ontario and Quebec at a low enough cost to enable it to compete with coal from the nearby United States. In fact, the province contains seventeen per cent of the coal resources of the world, and about 80 per cent of the coal resources of Canada. D. B. Dowling, of the geological survey of Canada, in the "Coal Resources of the World," has estimated that Alberta contains an actual reserve of over 385,000 million tons and a probable reserve of about 674,000 million tons. This makes a total reserve for the province of considerably over 1,000,000 million tons.

A close geological survey of the Drumheller area, one of the principal producing areas of Alberta, shows that it alone will be equal to the needs of many future generations. The yield, it is estimated will amount to approximately 1,200 tons per acre foot with an aggregate of ten feet of workable coal over at least 6,000 acres. Geologists estimate the reserve amount to nearly 100 million tons.

With reserves such as these, it may be confidently predicted that coal mining in Alberta is only in its infancy. The industry began in 1851 when coal was dug from the banks of the river at Lethbridge. A little later a mine was opened at Anthracite on the main line of the C.P.R., from which coal was mined for the use of locomotives and boilers in connection with the heavy construction work encountered in building that railway through the Rocky Mountains. From this small beginning the industry has grown till today there are 380 mines in operation, producing in the neighborhood of 6,000,000 tons per annum and giving employment to over 8,500 persons.

The problem of the industry in Alberta has been to find markets for the large tonnage which it is possible to produce. First war conditions and labor troubles in the United States in recent years have increased the cost of United States anthracite, the fuel which has until lately almost monopolized the market in Central Canada, that an opening was created for the Alberta product in this populous area. Experimental shipments were made to Ontario and the public was convinced that Alberta coal was a desirable domestic fuel. Freight rates were high, however, and the question was, could it compete with United States anthracite when conditions across the border became normal.

Last year the Canadian National Railways cut their rate temporarily on coal from Alberta to Ontario to \$7 a ton in an effort to encourage and popularize its use east of the Great Lakes. The continuation of this low rate, it was intimated, was conditional on the operators likewise reducing their rates in order to reduce the market. Unfortunately, production costs due to the large number of mines operating only a part of the year and the ease with which new mines may be opened when demand increases, have always been comparatively high. This season further complications have been injected into the problem by serious labor troubles in the Drumheller district, for instance, the output for March was only 35 per cent of normal. Of 22 mines only three worked continuously and these were forced to close for two or three days per week during the first three months of the present year. In District No. 18, one of the large producing districts in Alberta, the operators claim that wages amount to 65 per cent of the total cost of production. The result has been that due to these causes, and also in part to the short season during which the mines are operated, high production costs have continued.

This situation has given United States coal a chance to enter even the market west of the Great Lakes, a market in which Western Canadian coal gained supremacy during and immediately after the close of the war. This area which now imports around 2,000,000 tons annually is a natural preserve for Alberta and Western Canadian coal. United States coal interests, however, are making a strong bid for it, and they have the advantage of not only being highly organized but also of favorable transportation to the head of the lakes in boats returning there for cargoes of grain. When the navigation season is closed by winter this coal is hauled west from Port William as a return

freight in grain cars that would otherwise have to return empty.

While Alberta has all the natural facilities for developing a large and profitable coal mining industry it is apparent that some radical changes will have to be made in organization before the industry comes into its own. Over development is probably the chief trouble today, and some system is needed for regulating the opening up of new mines until there is an assured market for their output. An aggregate of ten feet of workable demand, so there is a problem also of getting more markets. The Central Canada market together with the one west of the great lakes, are natural selling fields, and there are prospects for developing a market in Vancouver and Seattle for bunkering of grain cargo ships. As soon as Alberta coal can be placed on these markets on a sound economic basis there is little doubt there will be an effective demand.

THE GOLDEN DAYS

The grand old times of which we read in tales by Scott and James, when knight went forth on prancing steed to play his doughty games! The grand old times when kings and queens, bejeweled, heaved their sighs, because they had no window screens to thwart the disapproving frown. King Henry, with his cloth of gold, and velvet rugs outspread, and gaudy splendors manifold, with rushlights went to bed. His palace had a grievous stink, hogs fed on every floor; it had no stove, no kitchen sink, no bathtub by the door. The knight might own a stock of bones, and yet, what could he buy? No radio, no telephones, root beer or whiskey dye. The knight was clad in armour bright that gave a martial ring; but when he would drench at night, it was another thing. He had to call a serving wench when reaching his hotel, and she, with axe and monkey wrench would ease him from his shell. When I am reading these old tales, with all their brave array, of stately damns and fighting males, I sometimes sigh and say, "I would that I with knights might prance, in my large power hat! The world is short of its romance—it's dull and tame and flat!" But when I think of bolted pants and shirts of soldered tin, I boast with rapture, to my nauts, the age we're living in!—Walt Mason.

Experimental shipments were made to Ontario and the public was convinced that Alberta coal was a desirable domestic fuel. Freight rates were high, however, and the question was, could it compete with United States anthracite when conditions across the border became normal.

For Dysentery You Should Use

It Will Give INSTANTANEOUS RELIEF

Dysentery is one of the worst forms of bowel complaint. It comes on suddenly, and the pains in the bowels become intense; the discharges come with great rapidity, and are very often so accompanied by blood. Dysentery does not need to persist for any length of time until the whole system becomes weakened and debilitated, and hardly any other disease so quickly undermines the strength and brings about a condition of prostration and utter collapse that often terminates in death. Mr. Robert Woodall, Kamloops, B. C., writes:—"I was sorely troubled with that terrible scourge, dysentery, for the last twelve months owing to the effects of ptomaine poisoning. I had absolutely no control over my bowels, and after trying several doctors' remedies I was induced to take Dr. Fowler's Ext. of Wild Strawberry. After doing so I got immediate and complete relief."

AIDING A WORTHY CAUSE

I used to be on the lecture platform myself. Possibly that is why I appreciate the point of a little story emanating from British sources.

It would seem that a popular novelist turned public speaker and went on tour through England, not for profit, but with a view to uplifting the masses. One of his first engagements was, by invitation, before the members of a newly formed provincial literary society.

At the conclusion of his address the secretary of the organization came to him, and tendered him a check for a modest sum. The distinguished visitor waved it aside.

"I am not doing this for the money which may be in it," he explained, "I very much prefer that you apply the sum to some worthy local charity."

"Oh thank you—most generous of you, I'm sure," said the grateful secretary. "Would you mind if we added the amount of the honorarium to our own special fund?"

"What is the purpose of this special fund?"

"To enable us to get better lectures next year."

DON'TS FOR HOUSEHOLDERS

Don't overvalue your property when placing insurance.

Don't start fires in stoves, furnaces or fireplaces unless you are sure the flues and chimneys are clean.

Don't allow a stovepipe to come in contact with wood. Use cement, tin, or galvanized iron where the pipe goes through.

Don't leave your home with a lamp burning or turned down low.

Don't wash clothing or other articles in gasoline, benzine, or naphtha, nor allow it to be kept in your house. Don't throw water on flames caused by burning gasoline, benzine, or coal oil, as it spreads the flames. Smother the fire with a rug of covering of some kind.

Don't use any but safety matches; others are dangerous.

Don't permit children to play with matches or start bonfires.

The first treaty to be signed by a representative of the Dominion of Canada which does not bear also the signature of the British ambassador, will pass through its final stage when formal ratification of the Pacific halibut convention is exchanged in Washington on or about October 31. Hon. Ernest Lapointe, minister of justice, who signed the treaty on behalf of Canada, will go to Washington to exchange ratifications.

CHURCH UNION TAKES ACTION FOR PASTORS

Toronto, Oct. 18.—Decisive action has been taken on church union on the question of providing for unionist ministers of anti-union congregations who decided to quit their charges and follow the Presbyterian church into the United Church of Canada. A special committee was appointed to perfect arrangements for the transfer and settlement of such ministers and for the raising of a special augmentation fund.

All ministers are urged to declare publicly at an early date their intention to serve in the Union Church.

Congregations are asked to accept the services of two ministers, especially where the unionist majority of a congregation goes out with the minister and joins a unionist congregation. In places where congregations are not able financially to support two ministers, a grant is to be provided from a special fund.

TWO MINUTES SILENCE AT 11 O'CLOCK, NOV. 11

Ottawa, Oct. 18.—The usual Armistice Day two-minute silence will be observed on Tuesday, November 11, at 11 o'clock throughout the British Empire. This is in addition to the observance of Armistice Day and Thanksgiving Day on Monday, November 10, in Canada.

Gentlemen of leisure who follow the illegal and dangerous practice of "hopping" on freight trains whenever their business, or lack of it, calls them from one place of temporary residence to another, are due to receive a rude shock. A determined drive against those who attempt to do their travelling in "ride-door pullmans" or by means of "riding the rods" has been launched by the railway companies, and this drive is to be prosecuted to the bitter end.

Don't use any but safety matches; others are dangerous. Don't permit children to play with matches or start bonfires.

The earlier in the week we receive the news the more appreciative we are. Send us the news.

Stettler, Oct. 17.—After a trial lasting four days, William Semple, of Castor, accused of arson in connection with a fire at Castor on July 31, was acquitted by a jury in the supreme court here yesterday afternoon. The deliberations of the jury lasted for only ten minutes, a verdict of "not guilty" being brought in at the end of that time. Mr. Justice Doyle in summing up apparently charged strongly in favor of the accused.

WOOD'S PHOSPHORINE.
The Great English Preparation. Tones and invigorates the whole nervous system, makes new blood in old veins. Used for Nervous Debility, Mental and Brain Weakness, Loss of Energy, Palpitation of the Heart, Failing Memory, Piles, Kidney, etc. Sold by all druggists, or mailed in plain package on receipt of price. New pamphlet mailed free. THE WOOD MEDICINE CO. TORONTO, ONT.

JOB PRINTING

The Better Kind

PRINTED STATIONERY is one of the "BIG GUNS OF BUSINESS" Every successful business man uses stationery—Letter Heads, Envelopes, Statements, Bill Heads, Circular Letters, Etc. Without them he would be lost.

The Times can supply your requirements in these lines as well as any city office and at the same prices charged by city shops.

The Wetaskiwin Times

Producers of Printing of the Better Quality

BASSANO MAN HAS
REAL SELF STOOKER

A grain stooker that will work when attached to a binder has long been desired by the farmers. Inventors have tried their hands at it but all have failed for various reasons until a Bassano man named Thomas B. Reed got the right idea and created the first satisfactory self-stocker. It weighs 250 pounds and is made to fit any type of binder.

The invention has been patented in all important countries and manufacturers have been camping on Mr. Reed's trail in an effort to secure the patent rights.

BUSY WAINWRIGHT DRILLERS

Nothing sensational, but steady progress is being made in the drilling operations in Wainwright field, says the Star. The B.P. No. 5 rig is going up, north of No. 2 well. Wainwright Oil Producers is adopting a policy of secrecy, and nobody knows just how far they are down, but they are still drilling. The Western Consolidated is drilling. Wainwright Dome is said to have bought a standard rig and will drill. Other companies are also said to be preparing to operate.

Brands on horses have their virtues but when it comes to selling such stock in the eastern part of Canada the brand is often a bar to a sale, says O. W. Adair, of the Wembley cafe, who has just returned from a lengthy tour of the States and Ontario, he taking a big string of horses to the latter place. While the equines suited the customers' requirements, they just couldn't overlook the brand marks which appeared to constitute a blemish in their eyes, thus lowering the selling price, quotes Mr. Adair.

PLAYING THE PART

Little Jessie was making a terrible noise while playing with her brother Jimmie, so mamma called to her: "Gracious, Jessie, why are you shouting in that terrible manner? Why can't you be quiet, like Jimmie?" "He's got to be quiet, the way we're playing," replied Jessie. "He's papa, coming home from the Elks, and I'm you."

BROWN—At Brightview, on the 20th inst., to Mr. and Mrs. James Brown, a son.

WIDEN—At Duhanuel, on the 18th inst., to Mr. and Mrs. David Widen, a daughter.

McALLISTER—On Thursday, October 16, to Mr. and Mrs. J. M. McAllister, 9134 80th Ave., Edmonton, a daughter.

WANTED THE BEST RESULTS

Muggins was really quite a thin, small man, but on this particular morning he looked bulky to say the least of it. The neighbors were surprised.

Jenkins, on his way to the station, paused in astonishment, as he saw Muggins emerge from the house.

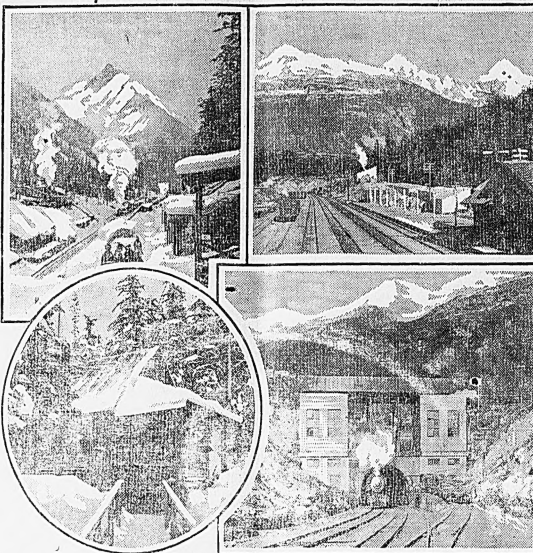

"Hello," he said. "You look well wrapped up. Where are you going? To the North Pole?"

"No," said Muggins. "I'm going to point the front door."

"But why are you wearing all those coats?"

"Because it says on the paint tin, to obtain the best results put on three or four coats."

LINING THE CONNAUGHT TUNNEL

Upper left.—In spite of heavy snowfalls and below zero weather the work of lining the Connaught Tunnel is continued through the winter months. The snow-covered heights of Mount Abbott and Ross Peak stand out in the distance. Lower left.—The resident engineer's house on the banks of the Millstream River. Lower right.—Interior of the Connaught Tunnel, showing the four large 14 ft. steel fans which ventilate the "big hole."

Lined up on the crest of the lofty Selkirk with half a dozen of the finest mountain peaks in the world hunching their snow-cold shoulders about its crests of trim brown houses, lies the picturesque town of Glacier on the main line of the Canadian Pacific Railway through British Columbia. Three and a half miles distant from this little construction centre, which has virtually been called into being through the lining of the Connaught Tunnel, hangs the great Illecillewaet Glacier on the slopes of Mount Macdonald and two miles nearer nestles Glacier House, the annual mecca of thousands of summer tourists.

Few of the surrounding peaks at Glacier are less than 9,000 feet in altitude. The famous Cheops, Mount Sir Donald, Ross, Eagle and Abbott Peaks encircle the little settlement. In winter time a blanket of snow enfolds town and mountains alike. In spring the brilliant yellow alpine lilies follow the ever-receding snow line as it climbs higher and higher up the mountain sides. Life is enlivened in the summer time by the crowds of guests who throng Glacier House and transform the scene again with generous splashes of orange, crimson and russet.

Common interest in the great engineering project under way has brought about a very definite community spirit at Glacier. For almost every youngster's daddy works in the big tunnel in one or other of the various branches of work which the lining demands, and every household is regulated by a schedule of working hours which begin at 5 a.m. and end at 1:15. Half a hundred children attend the little brown school house and various clubs for the grown-ups provide interests of a recreational and cultural nature.

Engineers, foremen, carpenters, machinists, drillers, electricians, laborers and train crews make up the wage earners among the 500 residents of Glacier. Single men live in a well ordered camp. Here, as in the little homes where the men with families live, all the conveniences of a modern city are enjoyed including electric lights and running water piped from a nearby mountain stream.

The lining of this five mile tunnel, the longest under the American continent, with a steel reinforced concrete jacket represents one of the most interesting engineering projects now under way anywhere in the world.

Beneath 6,000 feet of mountain the Connaught Tunnel cuts under Mount Macdonald between the stations of Connaught and Glacier. With the opening of this underground shortcut in 1916 the Canadian Pacific Railway overcame the many difficulties which the old Rogers Pass route had presented. Track curvature to an amount corresponding to seven complete circles was eliminated; the summit attained by the railway was reduced by 525 feet; the truckage was shortened by a half a mile; and more than four miles of snow sheds which had been necessary on the slopes of Mount Macdonald were dispensed with.

GENERAL NEWS

Moose Jaw—Entering the home of A. D. Gallagher of this city, by means of a key which opened the back door, thieves stole a diamond ring, a diamond and pearl necklace, and a small quantity of cash.

Vancouver—Robert Ellbeck, former sheriff of the Yukon and one of the best known old timers of the north, is dead here after a short illness. He was 71 years old and had resided here for the last few years.

Regina—It is estimated that bleaching will cause a reduction of one to two grades in the wheat crop affected by the heavy rains about nine days ago, according to telegraphic reports received by the provincial department of agriculture.

Toronto—Nonchalantly admitting he had "charge of the most one of the mildest rooms" in a west end section of the city, Cecil Kennedy appeared before Magistrate Branton and was fined 250 and costs for illegal purchase of liquor.

Toronto—Completion of major crop harvest by Ontario farmers has been permitted by the excellent weather of the past week, the report of the Ontario department of agriculture says. Fall plowing has become more general in preparation for the next crop.

You cannot sell the goods unless the public know you have them.

One of the queerest orchestras in the world plays music up in the sky. The players are members of a flock of pigeons carrying various kinds of air whistles attached to their tails by fine wires. Flocks of the birds flying through the air provide a unique and melodious aerial concert, says Popular Science Monthly. The originators of this unusual idea are the Chinese. The musical instruments used are of two different types—bamboo tubes and gongs with tubes attached. They are made to whistle by the rapid passage of the birds through the air.

Harvesting Every Month

A writer in an Australian paper says there is no month in which during which the wheat harvest is not being carried on in some part of the world. For instance, commencing at the beginning of the year, we have:

January—Australia, New Zealand, Argentina, Chile.
February—India.
March—India, Persia, Asia Minor, Lower Egypt, Mexico, Cuba.
May—Japan, China, Central Asia, Tunis, Morocco, Algeria, Texas.
June—Spain, France, Spain, Turkey, Italy, Greece, Japan, United States (south of 40 deg.)

July—France, Germany, Austria, Hungary, Roumania, Bulgaria, Southern Russia, Canada, Northern United States.

August—England, Northern France, Belgium, Holland, Central Russia, Canada, United States.

September—Scotland, Sweden, Norway, Canada.

October—Northern Russia, Finland, November—South Africa, Argentina and Peru.

December—Burmah, Australia, Argentina.

It ventures to say that Canada alone ultimately will raise sufficient wheat for over 1,000,000,000 people, or twice the present population of all the white races," declares Prof. George Rivers Anderson, head of the department of engineering, physics and photography, University of Toronto, in a special article in the Morning Post, of London, England.

"Can Canada be surveyed without the conviction that 200,000,000 people can live there in greater prosperity than the 45,000,000 here?" Prof. Anderson asks.

Prof. Anderson's article in the Morning Post is in refutation of gloomy forebodings indulged in by some of the scientists at the meeting in Toronto of the British Association for the Advancement of Science with reference to the world's food supply ultimately being insufficient to feed the inhabitants of the earth.

GREAT CHANGES
AT VIMY RIDGE

Quebec, Oct. 20.—That surprising changes have taken place in the vicinity of Vimy Ridge and other parts of the French and Belgian battlefields since the ending of the war, changes that astonish Canadian soldiers who have had a chance to "re-visit" the scenes of the conflict, was the gist of a statement by Brig-General H. T. Hughes, chief engineer of the Canadian Battlefield Memorial commission, who has returned to Canada to make an official report to headquarters at Ottawa.

General Hughes said that five im-

portant contracts were now nearing completion. These included a road across Hill 145, Vimy Ridge. The other developments were memorial parks at St. Julien, Bourlon Wood, Courcellette and La Quenelle Wood, as well as other minor work.

"In building the road across Vimy Ridge," stated General Hughes, "we unearthed a German tunnel which had never been discovered. We also came across other evidence of German work during the time they occupied the ridge."

It was learned that the principal work next year will be at Vimy Ridge where a suitable memorial will be erected.

Bargain in Newspapers

An Opportunity to Win \$5,000
A Beautiful Art Calendar Free

The Times has concluded an arrangement with the Family Herald and Weekly Star of Montreal by which we can offer the greatest bargain ever given to newspaper readers.

The offer includes a full year's subscription to both papers, an art calendar with a most beautiful picture subject ready for framing, and an opportunity to win a prize of \$5,000 cash.

In the Federal Election of 1921 there were 3,119,306 votes cast out of a total of 4,655,510 names on the voters list.

How many votes will be polled at the next Federal election? The Family Herald and Weekly Star are offering Ten Thousand Dollars in 94 prizes for the best estimates, and our arrangement with the publishers of that great weekly gives every Wetaskiwin Times subscriber an opportunity to make an estimate and perhaps win the capital prize of \$5,000. Some person will win. Why should it not be you?

We now offer a full year's subscription to both papers, including a copy of the Family Herald and Calendar and the right to make one estimate in the Family Herald's Election Contest.

Estimates must be made at the time of subscribing, and no changes will be permitted thereafter.

MORTGAGE SALE OF FARM LANDS

There will be offered for sale by public auction by George L. Owen at his Auction Yard at the corner of Pearce Street and Railway Street East in the City of Wetaskiwin, Alberta, at two o'clock p.m., on Saturday, the 25th day of October, 1924, the following lands in one parcel, namely:

The South-East quarter of Section 34, Township 45, Range 22, West of the 4th Meridian, Alberta, containing 160 acres or more or less, excepting thereout all mines and minerals, and the South-West quarter of Section 35, Township 45, Range 22, West of the 4th Meridian, Alberta, containing 160 acres or more or less, excepting thereout all coal.

The lands are situated about 6 miles from the Village of New Norway, and about one mile from the nearest school.

There are about 175 acres under cultivation and in crop and the balance of the land is used for hay and pasture, but can be broken up and cultivated. The soil is black loam with clay subsoil. The lands are fenced. The buildings on the land consist of a two-story frame dwelling house, 27x37; barn, partly frame and partly log, 38x55; large frame granary and machine shed; frame chicken house; log hog house, etc.

The property will be offered for sale subject to a sealed reserve bid and free from all encumbrances. The purchase price is payable as follows: 10% of the purchase price will be paid to the vendor's solicitor at the time of the sale; \$1250 will be paid into court without interest within 60 days and the purchaser will execute and deliver to the vendor a first mortgage against the premises for the balance of the purchase price, by which mortgage the principal will be payable at the rate of \$1000 per annum with interest on the balance remaining unpaid from time to time at the rate of 5% per annum, payable yearly. In all other respects the terms and conditions of sale will be the standing conditions of the Supreme Court of Alberta.

Further particulars can be had from Alexander Knox, Barrister, Wetaskiwin, Alberta, Solicitor for the Mortgagee.

Dated at Wetaskiwin, Alberta, this 7th day of October, A.D. 1924.

Violin Had Been Stored For Years Untouched

Violins may not have the sentiment and sensibilities attributed to them by imaginative musicians, but they have histories, interesting and varied, gay romances and dark tragedies, even as do their warm friends of mankind. A violin which is not only remarkable in itself, but with a remarkable story is one possessed by Axel Skovgaard, the Danish violinist, who is to appear at the Methodist church, on November 10th. It is as bright and polished as if it had left the hands of the maker but yesterday, and still the instrument is 200 years old. Mr. Skovgaard was the first person to play upon this old violin. Stadarius made his violin in memory of his dead son, and it had been retained in a museum until after his death, when his sons sold it to a collector, who in his turn sold it, when the instrument descended from father to son for many generations, finally passing into the hands of a London collector, who sold it to Skovgaard, still unstrung. Skovgaard paid \$15,000 for this fine old violin.

"Skovgaard has reached a point where he is above criticism. His training is that of the consummate musician—the finished, polished, purposeful. The innate genius of the player is that which attracts. It is the genius of a lover of music intellectually—New York Evening Sun.

SKOVGAARD THE DANISH VIOLINIST

Canada's Production Costs Figure in The U. S. Campaign

Canada is receiving much attention in the presidential election campaign. More than one of the political parties is pointing to the better advantages she enjoys in some lines of industry. This is especially true in regards the farmer, special attention being drawn to the fact that the Canadian farmer enjoys greater fertility of the soil for wheat growing, and has the advantage of lower freight rates.

The Republican campaign text book has some particularly interesting material of this nature. On the matter of Canada's advantages over the United States in wheat growing it says:

"Early in February, 1924, the United States tariff commission issued a report showing the results of its investigations in the United States and Canada as to the cost of producing wheat. The details of this report are very exhaustive, but the summary shows that the cost of producing wheat in the United States in 1923 ranged from 85 cents to \$2.18 a bushel, while in Canada it ranged from 53 cents to \$1.19 a bushel. Taking the minimum figure in each case, it will be seen that the Canadian wheat grower can produce a bushel of wheat for 32 cents lower than the American wheat grower."

Freight rates are a burning subject among the farmers, and on this subject the Republican text book says the following tribute to conditions north of the boundary line: "Now is this the only advantage which the Canadian wheat grower has over the American wheat grower. In January of this year the Omaha Bee published the results of an exhaustive study it had made with reference to the cost of producing and marketing wheat in Canada. One of the most significant features of this report was the difference in the cost of transportation to the Canadian wheat grower and the American wheat grower. It showed that the Edmonton, Alberta, wheat grower can reach the Chicago market by lake and rail haul for a rate of 39¢ cents per hundred weight. The same rate prevails to the wheat grower in the Calgary, Alberta, district. But the American wheat grower who ships to Chicago from American Falls, Idaho, must pay a rate of 32¢ cents per hundred weight to get his grain delivered in Chicago, or more than twice what it costs his Canadian competitor to reach the same American market. The rate from Billings, Montana, to Chicago, is 52¢ cents per hundred weight; from Cheyenne, Wyoming, 50¢ cents; from Denver, Colorado, 50¢ cents; from Grand Island, Nebraska, 37 cents; from Mitchell, S. Dakota, 32¢ cents."

NOTICE

Notice is hereby given that James Ross, who was connected with this company up to the month of April, 1923, is no longer in its employ, and has no authority of any kind to transact business on its behalf, or to act in any way in its interests. (Signed)

Sun Life Assurance Co. of Canada, North Alberta Office, Edmonton. A. L. Wright, Dir. Mgr.

MILLET

The Ladies' Aid of the United church are planning to hold a Thanksgiving supper in the community hall at Millet on Friday, November 7th. A head-on collision between two cars took place on the main road between Edmonton and Leduc on Thursday evening last. Both cars were badly damaged. The driver of the car was on the wrong side of the road, was hurt, and was taken by a passing car into Edmonton.

The citizens of Millet and community were astir on Monday evening of this week, the occasion being the silver wedding anniversary of Mr. and Mrs. John West. Upwards of two hundred assembled in Pinyon's hall, where the celebration took place, among the number being the early settlers of the district, who mingled with the more recent arrivals, all bent on doing honor to the bride and groom of twenty-five years ago. Mr. West is truly the pioneer merchant of Millet, as he has been in business here for over twenty years, and by honorable, straightforward dealing at all times, he has merited the very high esteem of a large circle of friends.

Mr. West has always had the deepest welfare of Millet and adjoining territory at heart, and very few of the early settlers but who can recall having been befriended by him in their hour of need.

After a beautiful and appetizing luncheon, Mr. A. P. Mitchell, reeve of the village, called the gathering to order and referred briefly to the pleasure everyone had in being privileged to join in the celebration of the happy event. He then asked Dr. T. D. Stevenson of Wetaskiwin to come to the platform and say a few words. The doctor referred to the growth of Millet from the smallest beginning until today it is one of the most thrifty and progressive villages in the province, and in this development, the efforts of the evening had done their full share. On behalf of their host of friends, the doctor then presented Mr. and Mrs. West with a handsome silver tea set as a slight token of the esteem in which they are held, and hoped they would be long spared to enjoy it.

Mr. West feelingly thanked the friends on behalf of himself and Mrs. West for their kind remembrance. As an old-timer he had shared in the joys and sorrows of many of those present, and this memento would tend to cement the friendships that had existed for so long even more closely together.

During the evening dancing and cards were enjoyed, music being supplied by an orchestra composed of Miss Disney and the Messrs. Rodney and Graham. The gathering dispersed in the wee sma' hours after all had joined in wishing Mr. and Mrs. West many more years of happy married life.

THE FATAL METAPHOR

The young man was telling his sweetheart how he had been attracted to her. "You were a lovely flower and I was a bee," he explained to her. "I was a mouse and you were a piece of cheese."

And that he wondered why she rose and left the room.

Do you know that The Times has considerably more than twice the circulation of any other paper in the district. Remember this when you are advertising!

The return of Canadians from the United States is given at approximately 5,000 a month, according to a bulletin issued by the department of Immigration. Since May, 23,851 Canadians have returned home. Since May 1, the total immigration to Canada has been 76,719, as compared with 80,161 for the same period last year. The largest movement from the United States during August was from Michigan, which amounted to 349. The state of Washington came next with 272, and New York state third with 172.

A Scotchman who was not feeling as well as usual called on his family doctor, who looked him over and gave him some pills to be taken at bedtime. A bottle of whisky was also prescribed for his stomach's sake—a small glass to be taken after each meal. Four days later Sandy called again on the doctor and said that he was feeling no better. "Have you taken the medicine exactly as I instructed?" the doctor inquired. "Well, doctor," said Sandy, "I may be a wee bit ahead w' the peels, but I'm about six weeks ahead w' the whiskey."

Every sportsman will be interested in the November issue of Rod and Gun in Canada. The stories and articles based on a variety of subjects, will hold the attention of all who read.

WETASKIWIN ALTA.

Provincial Weekly News Bulletin

Edmonton By-Election

Four candidates were officially nominated this week to contest the by-election in Edmonton for the vacancy created in the provincial legislature by the resignation of H. M. Bartholomew, Labor; A. F. Ewing, Conservative; W. T. Henry, Liberal; Gerald Pelton, Independent Liberal. Election day is on October 27.

Has Charge of New Course

W. J. Elliott, former principal of Chesham agricultural school and later with the livestock branch of the United Grain Growers, has been appointed by the provincial department of agriculture to take charge of the training of the British boys who will come to Alberta for special courses in practical agriculture at the Vermilion school of agriculture east of Edmonton. Under this plan which was evolved by Hon. Geo. Howley, minister of agriculture, in conjunction with the British Overseas Settlement Board, young men of from 18 to 25 years of age will be brought to Alberta for special training in agriculture before going on the land. There are now fifty of these young men on the way to Alberta to take this course having sailed this week. More will follow later.

Alberta Stock Wins Again

Alberta cattle were to the front in the prize winnings at the annual stock and feeder show at Winnipeg, Man., the past week. Mr. Minnick, of the Peace River district won first and second for the best five Shorthorn steers. Wright, of Lloydminster, won first for best carload of Shorthorns, while Poynter Bros., of Monitor, was

first in the Hereford classes. At the Saskatchewan and at Moose Jaw, Alberta men also won prizes.

Crownest Railway Rates

Consequent upon the cancellation by the Railway Commissioners of Canada, of the Crownest Pass railway rate agreement, Premier Greenfield, representing the Alberta government's views, made the following statement: "The government of Alberta considers the maintenance of the Crownest Pass agreement absolutely essential to western producers. The decision handed down by the Board of Railway Commissioners looks like the beginning of a long fight."

The provincial government acted jointly with the governments of Manitoba and Saskatchewan in the recent hearing at Ottawa, and expect to continue that arrangement.

"Unquestionably an appeal will be taken to higher authority. What the nature of the appeal will be, will not be decided until the government has had an opportunity to study the judgment of the board and confer with the governments of Manitoba and Saskatchewan."

Labour Placements

During the month of September the Alberta government employment service was able to place a total of 6,555 men in jobs, out of a total of 7,759 applications, of which 662 were withdrawn by the applicants. Of this total 5,049 placements were in agriculture, the majority being harvest men. During the first two weeks in September the employment service was able to fill 5,617 places out of 1,816, in comparison with Saskatchewan's placement of 4,425 out of 10,544 orders.

OVER EIGHTEEN MILLION POUNDS OF BUTTER WAS PRODUCED BY ALBERTA CREAMERIES LAST YEAR

"We are all interested in the dairy industry, at least, as customers, since dairy products comprise such a large part of our food. But it is with the disposal of the surplus product that I propose chiefly to deal this afternoon," said Prof. Marker, in his address to the members of the Philosophical society of the University of Alberta, on Wednesday afternoon. Of 70,000 farmers in Alberta who own dairy cows, over 40,000 furnish dairy products to the eighty-eight manufacturing plants in the province. These

eighty-eight factories produced last year nearly eighteen million pounds of butter and nearly two million pounds of cheese. The total value of dairy products produced in Alberta last year was over \$8,000,000.

In 1864 the first dairy cattle were brought into Alberta by the late Rev. John Macdougall. In 1894 the first butter factories were started in Alberta, at Edmonton, Red Deer, and Inuitfall. Others were started at Oils and Okotoks the following year. It was in that year that Prof. Marker, then with the dominion dairy branch first came to Alberta to aid in the development of the industry.

In 1896, the Hon. Frank Oliver asked the dominion government for the money to aid the settlers of the northwest. It was decided to give the farmers loans to build new creameries or buy out those already in existence but more or less bankrupt. With Dr. Robertson of the dominion dairy branch, Mr. Oliver covered the whole province and organized the dairy industry on a cooperative basis. The government undertook to handle the creameries for three years. A new factory was started at Wetaskiwin in 1897, and the others, which were then nearly all bankrupt or closed down, was taken over by the government.

Japan Trade Inaugurated

The success of this period of government enterprise was due to the fact that at that time there was no other alternative, said Prof. Marker. There was no outside markets, and one of the first duties of the government was to find an outlet for the surplus. A fairly regular but small business was soon built up with Japan. The building of the railway through the Crownest Pass, however, opened up a better market, and the special railway rates established at that time were of great value to the farmers of the Northwest Territories. The rush of 98 to the Klondike opened up a still better market, but this was nearly spoiled by one get-rich-quick firm sending in a supply of very poor butter. This setback was finally over come by the government supplying a standard supply of butter to the B.N.W.M.P. posts in the north, and gradually the prejudice against western butter was overcome.

In 1906 the province took over from the dominion the management of the dairy industry.

Factors in Upbuilding

Factors that have helped to build up the dairying industry to its present high position in Alberta, as outlined by Prof. Marker as follows: Firstly, the developing and holding of markets; secondly, the purchasing of cream on a quality basis. The quality of the butter depends largely on the quality of the cream, and there was a great improvement in quality as soon as the government began to grade the farmers' cream.

The annual dairy convention has been a great aid in the development of the industry. It was in the winter of 1910 that this convention voted unanimously in favor of quality marketing of cream. At that time there were a large number of privately owned and cooperative creameries in Al-

berta. The disposal of the ever-increasing surplus became a pressing problem. It became worse when the New Zealand butter began to invade the Vancouver market, and in 1912 seven million pounds of this butter came to Vancouver. To win back this market, Alberta had to produce a uniform export type of butter. Within four weeks after the dairy convention, the type of butter produced in Alberta was completely changed, and then this export type butter began to oust the New Zealand product from P.C.

The next problem that arose about two years later was the keeping of the large surplus of summer butter until the winter. This was accomplished by pasteurizing of all cream for butter making. This makes it last at least four or five months longer. Another trouble was that during the war, in common with most other goods, the quality of the Alberta butter deteriorated. This was due to quantity rather than quality production. The dairy convention of 1922 tackled this problem. The farmers were told how they had to improve their cream. The manufacturers got together and proposed to the government that cream buying stations be abolished and that government graders be appointed. This eliminated over competition with it consequent

lowering of the grade standard of cream. The same year this system was put into operation (1922) there was a tremendous improvement in the amount of first grade butter produced. This proportion of good butter has and is increasing every year.

It is a sort of chain of vertical co-operation between the producer, manufacturer, dealer and consumer that has built up the industry to its now present high place. The agitation now commencing for a dairy pool with a lot of light on the industry and few farmers a better understanding of some of the problems involved, said Prof. Marker.

Mr. and Mrs. W. T. Haigh returned from Wetaskiwin after a six weeks visit at his brother's, Thomas Haigh, —Coronation Review.

Calgary, Oct. 19.—For the first time in the history of the local police court a woman will face the magistrate on Monday charged with driving a car while under the influence of liquor.

Mrs. H. G. Gidson of Carlton-on-Trent, England, made a very pleasant sojourn with her cousins, Mr. and Mrs. J. E. Fraser, while en route to her home after having accompanied her sister to her future home at Prince Rupert. While in the city she visited the Montgomery Fox Ranch and was greatly interested in the animals there. Before leaving on Saturday night, Mrs. Gidson met a number of the Wetaskiwin ladies at the home of Mrs. G. E. Wiseman, and before embarking on the train enjoyed a midnight lunch given by Mrs. Donald Ross, in her honor. Although having travelled extensively in the old lands, including France, Switzerland and Italy, this was her first visit to Canada. Toronto and Niagara and the East appeared to her like old familiar scenes and the Rockies as compared with the Alps greatly impressed her, but no more so than the heartiness of the people she had the pleasure of meeting in the West, with the result that she hopes to come back in two years' time.

A large list of vegetables, etc. donated to the hospital, was received too late for this issue, but will appear next week.

TOWN TOPICS

The Wetaskiwin Produce Co. received and shipped over half a carload of live poultry on Friday last.

The W.A. of Immanuel church will hold a bazaar on Saturday, November 29th, the place to be announced later.

George Wiseman was at Edmonton on Tuesday evening attending a banquet given by the Dominion Express Company.

Remember the chicken supper to be given in the Parish hall on Thursday evening of this week by the W.A. of Immanuel church.

Mrs. John M. Jackson and two grandchildren left Wednesday morning for Denver, Col., where they will meet the children's father, and where they will reside for some time.

The Women's Missionary Society and the Mission Band of the Methodist church will hold a bazaar and sale of food on Saturday, December 13th, particulars later.

A Halloween tea will be held at the home of Mrs. E. T. Williamson on October 31st from 3 to 6 p.m., under the auspices of the W.M.S. of the Methodist church.

The weather continues to be ideal, and threshing is progressing very favorably. It is expected that threshing will be completed in the Wetaskiwin district in about two weeks.

R. W. Manely, who was in the Provost district last week, on a shooting trip as well as looking after provisions, brought in three nice geese, as well as some ducks and chickens.

The Red Cross tag day, on Saturday last, was very satisfactory, as the sum of \$50.50 was realized as a result of the day's efforts. The girls of the C.G.I.T., who sold the tags, are to be commended for the work they did on this occasion.

Miss Jarvis and Miss Bennett, of Stettler, who are attending the Normal school at Canmore, and Mr. C. H. Howells, of Kelowna, B.C., a nephew of Mrs. Lawson, spent the weekend at the home of Mr. and Mrs. Thomas Lawson.

The Ladies' Aid of the Swedish Mission Friends will serve coffee and lunch from 3 to 8 p.m. on November 1st in the hall next to the Wetaskiwin garage. 2 woolen comforters, home-made stockings, etc., will be sold at 8 p.m. Everyone is cordially invited.

BUSINESS LOCALS

***Friday and Saturday Tom Hilt in "The Trouble Shooter" Monday and Tuesday. Zano Grey's story "The Call of the Canyon." Remember the big special feature "Scaramouche" on November 3, 4 and 5. Particulars next week.

Filling the Vacant Alberta Senatorship

It is currently reported that the vacancy in the senate caused by the death of the late Senator Cote is to be filled by the nomination of Mr. H. H. Martin, of Edmonton. Mr. Martin, like his immediate predecessor, and in fact like all who have occupied the seat in question, is a representative French Canadian, and his appointment would be an exceedingly popular one in the east, as it is claimed that it would also be in the west. That Mr. Martin is popular with the English speaking element as well as the French Canadian in the west is shown by the fact that he is a past president of the Edmonton Liberal Association, the Edmonton Board of Trade and the Canadian Club. He was chairman of the chief committee of the Patriotic Fund throughout the war and up to July 1923. He also served as adjutant of two training schools for officers and is president of various commercial and financial committees as well as of the Edmonton Club and Country club and committee chairman of the Keno club. As to his faith, he is reported to be a Roman Catholic, and it is claimed that he belongs to the church to which he belongs. It may be mentioned that he holds the power of attorney for his Grace the Archbishop of Edmonton as well as that of His Lordship the Bishop of St. Albert. The proposed appointment of Mr. Martin to the senate would indeed be a popular one. Quebec Telegraph.

Ottawa—The term of W. B. Nantel as deputy chief commissioner of the board of railway commissioners expired Monday. As yet no appointment to fill the vacancy has been made.

OBITUARY

MRS. AMELIA TOST

Another of the early settlers of the Wetaskiwin district passed away on Thursday last week in the person of Amelia, beloved wife of Herman Tost, at the advanced age of seventy-nine years and two months. She came from Chilli in the year 1898 and settled with her family on a farm eight miles south of Wetaskiwin, where they have since resided. The late Mrs. Tost was well known by a large circle of friends and acquaintances and was held in the highest esteem by all who knew her.

She leaves a husband and family of two daughters and one son, namely Mrs. C. H. Rix, of Wetaskiwin; Mrs. Miller, of Brazil, South America, and Eric, at home.

The funeral took place from the German Lutheran church, Wetaskiwin, on Sunday afternoon, the service being conducted by Rev. C. Thies. A very large number of the neighbors and old-time friends were in attendance to pay their last tribute of respect to the departed.

HAMILTON'S CITY HALL HAS SCANDAL

Hamilton, Oct. 17.—Starting with the flight of a cashier from the city treasurer's office, Hamilton's civic scandal has grown by leaps and bounds with sensation piling upon sensation until now it has criminally involved 20 persons, jeopardized the positions of seven high civic officials including five department heads, and spread to five civic departments. These criminally involved are Harold S. Forbes, missing cashier from the city treasurer's office; Ernest E. King, clerk in the tax department; George Saunders and James Hartley, accountants in the Dominion Income tax office; Thomas G. Fisher, clerk in the city accountant's office, and fifteen citizens who are accused of complicity in a scheme to defraud the city of tax money. It is even said that many more citizens will face similar charges. Forbes is still at large and a reward of \$500 has been offered for his capture, but the others are awaiting trial. The following departments are involved: tax, accountant's, auditor's, treasurer's, and license department.

The various phases of the great civic scandal which will be the subject of a judicial inquiry shortly sound almost unbelievable. Upon the plea of his wife's confinement, Harold Forbes, for ten years a trusted employee of the city, asked for holidays. On September 2, when he had not returned, City Treasurer W. H. Davis commenced inquiries and discovered that Forbes left the city on the day on which he was granted holidays, leaving his young wife in the hospital where a baby was born a few days later.

A week spent in scrutinizing Forbes' books followed and then shortages of approximately \$32,000 were located. A warrant for embezzlement was then issued against Forbes. Mayor F. W. Jutson immediately engaged C. S. Scott and company, chartered accountants, to examine the treasury department books. The auditors, twelve of them, have been at work even since and after a month or more of probing they discovered Forbes' shortages to total the enormous sum of \$60,000, nearly double the original estimate made by the city treasurer.

It is predicted that the auditors' report will show a lamentable condition in the treasury which permitted such huge defalcations to go undetected, but at the same time it is explained that Forbes used much ingenuity in covering up his shortages. He checked over all tax receipts and sent them to the bank. In doing so, he extracted several large amounts, hiding this by delaying the entry on the receipt side of the ledger until the following month. A large item of cash received in the next month would be used to balance this another delayed entry recorded for it. At first it was thought that these manipulations extended back only as far as last May, but the auditors now state that they go back into last year.

This disclosure was followed quickly by information handed by Ald. C. L. Alchison to Mayor Jutson to the effect that a civic employee was conspiring with outsiders to defraud the city of taxes in which the auditor described as a "50-50 tax evasion scheme."

Daysland, Oct. 16.—Interesting experiences of their recent trips were given at Friday's meeting of the Daysland Women's Institute by six ladies. Mrs. W. H. Welles, an old timer of Daysland, now living in Wetaskiwin, told of her visit to the Florida home of Mr. and Mrs. J. J. Sternberg, formerly of Daysland. The grape fruit and oranges in their garden was delightful, also the 335-mile drive along the Dixie highway to Miami, but Mrs. Welles noticed the scarcity of flowers as compared with California.

TOWN TOPICS

C. Niles has closed the liquor warehouse adjoining the hospital and moved the stock to his store.

Mrs. Patterson has moved the restaurant from Pearce street to her residence, corner of Alberta and Stanley streets.

Remiday, who is representing the Swedish Paper in Winnipeg, arrived in the city this week and will spend some time in the community. Mr. Rom of Calgary, came up on Tuesday evening to spend a few days visiting his sister, Mrs. L. D. Hanna, and other friends in Wetaskiwin.

Wm. Carruthers has a nice patch of Everbearing strawberries which are still producing fruit. Last week we were shown several fine large berries which were picked in his garden.

Quite a number of Wetaskiwinites went to Edmonton on Tuesday to see the championship basketball game. The Edmonton Grads got the better of the game by defeating the Chicago team by a score of 26 to 13.

What might have been quite a serious accident happened on Wednesday evening last when a car driven a car in front of C. D. Smith's. Both cars were damaged to some extent, but fortunately nobody was injured. By a son of E. H. L. Thomas ran into

Remember the Halloween dance at the Blue Lantern on Friday evening, October 31st, under the auspices of the Club N.W. Wetaskiwin. Among the attractions will be novelty dances and fortune telling. Everybody come—good eats and a good time assured.

The W.C.T.U. will hold an entertainment in the Methodist church on Tuesday evening, November 4th, at eight o'clock. Outside speakers will give short addresses and a pageant will be put on. A musical program will also be rendered. Silver collection will be taken.

The Women's Institute will meet in their club rooms, Pearce street west, on Thursday, October 30, at 2 o'clock p.m. Mr. W. H. Odell will address the ladies on "Property Rights of the Married Woman." Every lady of the city and district is invited to attend and hear this very important clause of law discussed. Tea will be served.
